# THE BANK OF RUSSIA STANDARD

## FINANCIAL MESSAGES IN THE NPS. EXCEPTIONS AND INVESTIGATIONS MESSAGE USAGE GUIDELINES

Introduction date: 2021-04-05

### 1. Scope

This Standard is recommended for organisations usage when sending financial messages related to exception and investigation in the currency of the Russian Federation.

This standard is intended to:

- funds transfer participants;
- developers of information and program software, information systems.

Additional financial message schemes may be included in this Standard at the suggestions of the funds transfer participants.

This Standard is developed to organisations the financial messages exchange in the NPS with unified formats as is also unification communication facility of the automatized systems of the payment market participants. This permits to provide the business process automatization in the NPS and straight-through processing rate.

The ISO 20022 messages set is developed with applying unified rules of the message drawing up. These unified rules are provide applying unified elements for funds transfer irrespectively using communication channels.

The ISO 20022 message set is form the basis of the financial fund transfer messages in the NPS.

Implementation of data exchange in the NPS in accordance with the ISO 20022 standard is recommended and provided in the Bank of Russia Standard STO BR NPS-6.1-2020 "Financial Messages in the NPS. Data Exchange Rules".

Provisions of this Standard are applied on a voluntary basis, unless regulatory acts of the Bank of Russia or terms of contracts make some provisions obligatory.

### 2. Terms and definitions

XML <sup>1</sup>	– extensible mark-up language used in XML documents.
XSD file	– file with a *.xsd extension containing the XML-scheme.
OCL <sup>2</sup>	– object constraint language, establishing creation, structural and logical controls rules.
XSLT <sup>3</sup>	– language for converting XML-documents from one XML-scheme to another.
Validation rule	– rule for the verification of element values in OCL.

<sup>1</sup> XML – eXtensible Mark-up Language

<sup>2</sup> OCL – Object Constraint Language

<sup>3</sup> XSLT – eXtensible Stylesheet Language Transformations

### 3. Implementation guidelines

The ISO 20022 methodology sets separate descriptions of the business level and messages syntax. Processes, roles and interaction models are described at the business level. It defines the information required by funds transfer participants for the implementation of business processes. The structure and the element composition of financial messages are developed on business processes basis.

Interaction models, roles and scenarios of funds transfer participants communication are described in the Bank of Russia Standard STO BR NPS-9.0-2021 "Financial Messages in the NPS. Exceptions and investigations. Interaction Models".

This Standard describes the structure and the element composition of financial messages at the logical and physical levels of modelling in accordance with the ISO 20022 methodology. Financial messages in the NPS are developed on the basis of the standard ISO 20022 for payments, taking into account the NPS legal framework (hereinafter – NPS Unified Messages). The NPS Unified Messages are recommended by the Bank of Russia for using for exceptions and investigations in the NPS.

The NPS Unified Messages are based on ISO 20022 messages from the functional area CAMT (Cash management).

The messages definitions of the NPS Unified Messages are presented in XLSX-files.

Each of the NPS Unified Messages has its own name in accordance with the ISO 20022 standard. This name contains functional area identifier, message identifier from the ISO 20022 repository, identifier of the variant, message version, and the text name.

For example, the name of the NPS Unified Messages «camt.029.001.10 ResolutionOfInvestigation» includes:  
«camt» is the functional area identifier,  
«029» is the message identifier,  
«001» is the variant,  
«10» is the version, and  
«ResolutionOfInvestigation» is the text name.

The NPS Unified Messages comprises:

- complete elements composition,
- data types and restrictions,
- XML-tags,
- xPath (element location (path) in the hierarchy),
- fill-in rules,
- descriptions from original ISO 20022 Message definition reports and their translation into Russian.

In case of absence of mapping between original element and element which is necessary to include in financial message according to national practice – «Supplementary data» can be used.

For structural, logical and format control of financial messages:

- original XSD-files from the ISO 20022 electronic repository from [www.iso20022.org](http://www.iso20022.org) as international format requirements and elements filling rules;
- OCL rules as national format requirements and fill-in rules are applied.

This Standard contains:

- messages definitions of the NPS Unified Messages in XLSX-files (Annex 1);
- international requirements for formats and fill-in rules in XSD-files (Annex 2).

Funds transfer participants can apply this Standard for specific activities setting additional internal restrictions for generating private financial message schemes.

If a funds transfer participant establishes additional requirements for structural and logical controls of financial messages included in this Standard, It is recommended that these requirements be assessed against the control rules included in this Standard.

## 4. Message set overview

The following table contains all of the NPS Unified Messages in the NPS definitions described in this message usage guide in accordance with the Bank of Russia Standard STO BR NPS-9.0-2021 "Financial Messages in the NPS. Exceptions and investigations. Interaction Models".

<b>№</b>	<b>Message Identifier</b>	<b>Message Name</b>
1	camt.055.001.09	CustomerPaymentCancellationRequest
2	camt.056.001.09	FItoFIPaymentCancellationRequest
3	camt.087.001.07	RequestToModifyPayment
4	camt.027.001.08	ClaimNoReceipt
5	camt.026.001.08	UnableToApply
6	camt.029.001.10	ResolutionOfInvestigation
7	camt.030.001.05	NotificationOfCaseAssignment
8	camt.033.001.06	RequestForDuplicate
9	camt.034.001.06	Duplicate
10	camt.031.001.06	RejectInvestigation
11	camt.032.001.04	CancelCaseAssignment
12	camt.038.001.04	CaseStatusReportRequest
13	camt.039.001.05	CaseStatusReport
14	camt.036.001.05	DebitAuthorisationResponse
15	camt.037.001.08	DebitAuthorisationRequest
16	camt.028.001.10	AdditionalPaymentInformation
17	camt.035.001.05	ProprietaryFormatInvestigation

## 5. Standard maintenance

This Standard and annexes are published on the Bank of Russia website [www.cbr.ru/PSystem/iso\\_20022/](http://www.cbr.ru/PSystem/iso_20022/).

Changes in this Standard are made as required.

The NPS Unified Messages which the Bank of Russia recommends for use in the NPS are based on the latest version of international financial messages published on the ISO 20022 standard website.

The ISO 20022 e-Repository is updated annually, however, the possibility of using previous versions of international financial messages of the ISO 20022 standard does not stop.

The Standard is updated by the Bank of Russia.

Amendments may be introduced to the Standard if the Bank of Russia and Technical Committee № 122 «Financial transaction standards» adopt a decision that a new version is required on the following grounds:

- the NPS legal framework changes,
- publication of a new version of the ISO 20022 e-repository on the ISO 20022 standard website,
- change requests of payment services market participants.
